1

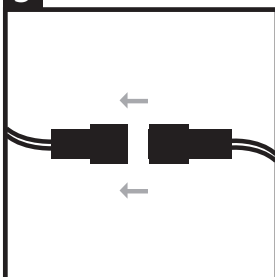

First, check whether all the parts are contained in the box, and test the set before installing it in its permanent place.

2

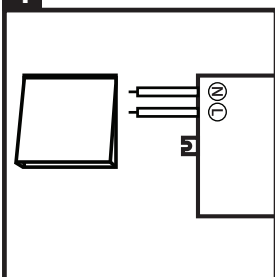

Drill the holes, size 35 mm, at the desired place. Next, position the transformer of the LED spots on the desired location. Place the LED spots in the drill holes. Now you can push the two spirals against the spot to move it into position.

3

Link the LED spots to the transformer.

4

Now you can connect the transformer to an an on/off switch. PRI N = blue wire and PRI L = brown wire. We recommend to switch off the branch circuit beforehand!

Your lightening is now ready for use. We wish you the best of luck with your purchase.
