1

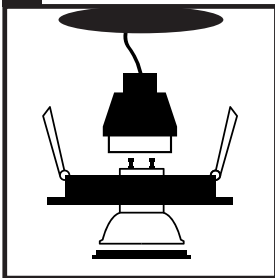

First, check whether all the parts are contained in the box, and test the set before installing it in its permanent place.

2

Drill the holes, size 80 mm, at the desired place. Now you can connect the fitting (through the hole) to an electric current. We recommend to switch off the branch circuit beforehand!

3

Now you can push up the two spirals and move the spot into position. Next, connect the LED spots to the fitting. Then position the LED recessed spot in the fixture. The inner ring must be removed. Your lightening is now ready for use.

We wish you the best of luck with your purchase.
