

Please read these installation instructions carefully before installing and using the lighting. This way you remain risk-free and avoid damaging the product. These installation instructions are applicable to the LED strips (for verandas) with the Wifi Veranda LED receiver.

Caution: The transformer and Wifi Veranda LED receiver are not included as standard.

1

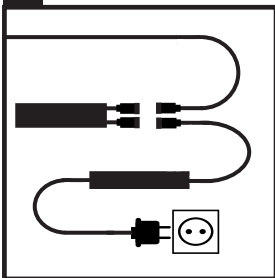

First, check whether all the parts are contained in the box, and test the product before installing it in its permanent place.

2

Place the LED strip in the desired location. Remove the 3M tape from the LED strip and then paste it into the profile.

3

Now connect the LED strip to the wifi veranda LED receiver. You do this by connecting the couplers. Do you have several LED strips? Then you need to connect the LED strips to the cable connector that you connected to the wifi veranda LED receiver before.

Now connect the transformer to the wifi veranda LED receiver and then plug the transformer into the wall socket.

4

View the Hamulight wifi LED receiver user manual to programme the receiver and control the lights via the app.

Your lightening is now ready for use. We wish you the best of luck with your purchase.
