

Please read this manual carefully before installing and using the lighting.
Do this for your own safety and to prevent damage of the product.
This manual is applicable to the LED ground light L1040.

1

First, check whether all the parts are contained in the box, and test the product before installing it in its permanent place.

2

Drill the holes, size 75 mm, at the desired place. Place the LED ground light in the drill hole. We recommend handling the cable at least 50cm below ground level.

3

Now you can connect the LED ground spot to power. N = blue wire, L = brown wire and \oplus = yellow/green wire. We recommend to switch off the branch circuit beforehand!

Your lightening is now ready for use. We wish you the best of luck with your purchase.
