

Please read this manual carefully before installing and using the spots. Do this for your own safety and to prevent damage of the product. This manual is applicable to the LED (veranda) surface-mounted spot Tarifa. The spotlight is delivered including a 2-way cable.

Please note that the transformer and wifi Veranda LED receiver are not included as standard.

- 1**

First, check whether all the parts are contained in the box, and test the set before installing it in its permanent place.
- 2**

Attach the bottom of the Tarifa surface-mounted spotlight to the beam with the 2 screws. Drill a hole in the middle for the cable to pass through. Place the top of the Tarifa spotlight on the mounted underside. This is magnetic so the spotlight will stay on this way.
- 3**

Now connect the Tarifa spotlight to the 24 volt wifi veranda LED receiver. You do this by connecting the couplers. Do you have several Tarifa spotlights? Then you need to connect the spots to the cable connector that you connected to the wifi veranda LED receiver before.

Now connect the transformer to the wifi veranda LED receiver and then plug the transformer into the wall socket.
- 4**

View the Hamulight wifi LED receiver user manual to programme the receiver and control the lights via the app.

Your lightening is now ready for use. We wish you the best of luck with your purchase.
