

Coblux LED recessed spotlight | black | square | warm white | 4 watt | dimmable | tiltable

Product Images

Short Description

The black Coblux LED recessed spotlight square consumes 4 watts and is dimmable and tiltable. The light color of the spot is warm white (2700k).

Description

The Coblux LED recessed spot square is at home in every interior. This is due to the stylish design and the black color of the luminaire. The Coblux can be dimmed with, among others, a LED dimmer, and the direction of the light beam can be adjusted by tilting the spot. With the consumption of 4 watts, you can replace old halogen lamps of 50 watts. This just goes to show how energy-efficient and environmentally friendly the Coblux recessed spot is.

The Coblux spot comes with a GU10 fitting. The advantage of this fitting is that you can replace only the spot and you do not need to replace the luminaire. You connect the GU10 fitting directly to a 230-volt power cable, and then screw the spot into the fitting. Finally, you mount the fixture on the ceiling. We recommend that you first turn off the power before starting to assemble.

Are you convinced by this stylish black Coblux LED spotlight square? Then don't forget to take a look at the accessories that come with this spot.

To control the spotlights, there are several ways available. Below you will find all available options:

- LED rotary dimmer Atlas
- LED push dimmer Novex
- Remote control Moon
- App (with purchase of wifi LED receiver free access)

Tip: the Coblux spotlight is a large spotlight. Therefore, check whether there is enough space between the original and the lowered ceiling.
